

Clinical Simulation Laboratory

Meet the Mannequin

1. Find the patient's pulse (Carotid, Radial, Brachial, Femoral, Popliteal and Pedal)
2. Is the patient blinking?
3. Is the patient breathing?
4. Listen to heart and lungs sounds. Are they normal?
5. What is the patient's heart rate?
6. Take the patient's blood pressure
7. Find the IV arm
8. Are the pupils reacting to changing light stimuli? (**HPS ONLY**)
9. Is the waveform monitor displaying vital signs?
10. Ask the patient a question, you may get an answer.
11. Find the Drug Recognition System. (**HPS ONLY**)
