STS 203	.01	Surgical Procedures	6	Trad	Class	Tues/Wed	9:00 AM	12:00 PM	TBD	15	C. Corrigan	STS 200, STS 201	STS 204
STS 204	.01	Clinical Education I	4	Trad	Clinical	Thur/Fri	7:00 AM	3:30 PM	Clinical	15	C. Corrigan	STS 200, STS 201	STS 203

**Before enrolling in an online or an accelerated/blended section, consider whether it is the right course.**

***What are the advantages of online learning?***

- It offers flexibility in that coursework can be done any time and any place the student has access to an online computer.
- For students who enjoy reading, writing, and analyzing, it offers a stimulating environment.
- It offers the opportunity to learn independently.
- It offers the opportunity to enhance computer and written communication skills.
- It helps the student experience a learning situation that is more similar to the working world of managing projects, being self-directed in completing assignments, and communicating responsibly.

***What are the challenges of online learning?***

- It requires personal responsibility, discipline, and organization to complete the assignments as required.
- It will likely be more time-consuming because it requires reading and typing which are more labor-intensive than listening and talking. The College estimates that time spent in *online discussion* will take 50% longer than in-class discussion.
- Except for the math course, most of the learning and assessment is focused on reading and writing skills so this is a challenge for students who struggle in these areas.
- Students with weak computer skills or slow internet connections are likely to become frustrated.

***What is an accelerated/blended course?***

- Accelerated courses incorporate into 5 (or 8, depending on the course) weeks what is normally covered in 15 weeks. This is accomplished by combining four hours of class once a week with a significant amount of online content.
- These courses are designed to be taken one at a time so combining this type of course with more than one regular semester course will be extremely challenging.
- The advantages and challenges of online learning should be reviewed prior to registering for accelerated/blended courses.
- Students with weak computer skills are encouraged to take CMP 101 Introduction to Computers to develop the skills needed for accelerated/blended courses.
